

# ***Create Art that Heals and Inspires***

Spring 2015

Greetings!

Susquehanna Community Health and Dental Center (SCH&DC), an independent Federally Qualified Health Center located in Hepburn Street Plaza, is pleased to announce that we are expanding and renovating at our current location. We plan to open a fully renovated and expanded community health center in the coming months. Not only will we have additional space to provide our quality primary care and dental services, we will be increasing our ability to care for new patients.

Our Board of Directors is looking for a large work of art to display in the patient hub area of our health center. Behind the patient check-in, check-out area, there is a section of wall where we want a work of art. We envision a piece of art that:

1. Is creative, bright, eye-catching and has a positive impact (for example happy graffiti)
2. Is made using a smooth, two dimensional medium
3. Reflects, directly or indirectly, our mission and our patients who represent the entire age spectrum and come from diverse backgrounds and cultures.
4. Could be a 'mural' or large single piece of art

We want to engage our community in the creation of this piece of art. Whether it be an artist in our community, an art program, a group of artists or art students, or some other collaborative effort.

SCH&DC will supply a schematic of the location, as well as interior design samples (paint colors, carpeting, etc.). SCH&DC will cover the cost of supplies needed for the project and provide exposure, recognition and visibility to the artist(s). SCH&DC is a non-profit, community-based organization and can provide a letter documenting the donation of the time it takes to create the art.

If you are interested in receiving the additional information, please call Jeanaryl Likens at (570) 567-5412. Please visit our website [www.aimhealthy.org](http://www.aimhealthy.org) to learn more about our expansion and our organization.

*Thank you for your interest in Susquehanna Community Health and Dental Center!*
